March 13, 2014

Chairman Weisz, members of the Information Technology Committee, I am Jenny Witham, Director of Information Technology Services for the Department of Human Services (DHS). I appear before you to provide an update on the status of the Medicaid Systems Project.

DHS is working with the primary system vendor, Xerox Corporation, on a revised work plan for the completion of the project. At this time, we are targeting a September 2014 implementation.

Xerox recently completed System Integration Testing (SIT) by resolving all critical and high severity defects. DHS staff is continuing to execute User Acceptance Testing (UAT). For UAT, all the functional area test cases must be executed with a 90 percent pass rate; failed test cases cannot have open defects with a severity of critical or high; and failed test cases cannot have more than 10 percent with a defect severity of moderate. The tables on the next page outline the SIT and UAT test progress to date.

In addition to SIT and UAT, multiple testing activities are underway and planned for the remainder of the pre-implementation period. These include data conversion testing, end-to-end testing, performance testing, 508 ADA Compliance testing, interface testing, trading partner/Electronic Data Exchange testing, operational readiness testing, and parallel testing.
